They recently opened up a whole new world with free characters of color. They are absolutely stunning! You simply have to watch a short video to unlock each character. Some premium ones require a subscription but the majority of them are free with tons and tons to choose from and many gorgeous categories. I'm so glad I re-downloaded this. I especially love how I have control over the color spectrum and it offers different textures in your character color, glow, mirrored, flat, shade and some others. Thank you your developer! Well, so the app's idea with the app itself is actually better than I thought. Honestly, I would continue to use it. Although I do and others, he says that's not really much to choose from. I mean, you literally only get like six characters to choose from! Only one of every shelf! Honestly, I would like the best app if there was an ability to watch a video to unlock a character, or something like that: something other than simply buying everything else. I'm not meant to be crude, but I'm pretty sure most of your target audience isn't going to have the money to buy all of that. Although, other than the reason, the app is really great! He just has room for improvement. Therefore, I give it 3 stars. We've heard your feedback. Get the latest version. All Colors are now free after viewing one ad. (With the option to disable ad). We also added new faces and features. Hope you enjoy! :) The developer, Figuromo Studio LLC, did not provide details about its privacy practices and handling of Apple data. For more information, see the developer's privacy policy. The developer will be required to provide privacy details when submitting their next app update.
